

1st EDITION of the CANCER & WORK BAROMETER IN CATALONIA 2022

/01 For people living with cancer, work remains essential

say work is important, and is one of the aspects that gives their lives meaning.

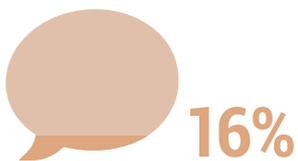

say their job is the same as before the illness.

have had to change the type of work they do, either within the company or elsewhere.

/02 When it comes to cancer stigma in the workplace, more should be done

Employees living with cancer

do not communicate that they are suffering from this disease.

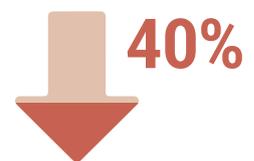

say that people become more distant or find it more difficult to talk to them.

Colleagues of employees living with cancer

Consider their co-workers with cancer more productive or as productive as they were prior to their diagnosis.

Believe that their colleagues with cancer do not have the same career growth and professional opportunities as others.

/03 Workers demand better support from their employers

say that they have not received any information from the company.

say that their company gives little or no support to employees with cancer.
